Goals

I strive to become a solution architect/business analyst to be able to create complex and large-scale IT systems in the future.

About me

Backend developer with 3+ years of experience building scalable web applications and services. Strong focus on Node.js/Nest.js ecosystem, API design, and system architecture. Experience with payment processing, real-time notifications, and message brokers (Kafka). Currently completing Master's in Financial Engineering at HSE, with additional training in AI/ML systems.

Work experience

Pandaverse OU

04/2025—10/2025, Full-stack developer, Saint-Petersburg

- Development and support of the web application user interface using Next.js supporting more than 1000 users;
- Design and implementation of the application server using modern architectural patterns with Nest.js and Typeorm;
- Optimization of application performance by 70% and refactoring of the codebase to improve readability and maintainability;
- Design of a scalable application architecture with business requirements for online scheduler;
- Development and testing of database functionality using Jest, achieving 80% code coverage;
- Implementation of business logic and new features according to the technical specifications.

Dipal

05/2024—03/2025, Backend developer, Saint-Petersburg

- Development of a service for processing subscriptions and payments by using Nest.js handling 1000 transactions monthly;
- Optimization for cross-platform notifications (iOS, Android) and management of local servers;
- Improving the quality of program code and processing requests from the broker (Kafka);
- Led migration to updated package manager and message broker infrastructure.

Startup «My Doctor»

04/2023—09/2023, Flutter developer, Saint-Petersburg

- Developed authentication module (login, registration, JWT-based auth) from scratch.
- Designed application architecture and user account management system.

M&C Training Center

06/2022—01/2023, Full-stack developer, Almaty

- Designing user interfaces using Figma;
- Database and Backend server optimization using Node.js;
- Implementation and updating of UI/UX on Frontend using React.

Education

HSE University, Moscow

10/2025–06/2027, «Financial Engineering»

Main subjects: Financial markets analysis, portfolio management, structured products, corporate finance, risk management, econometrics

ITMO University, Saint-Petersburg

09/2020–06/2024, «Mobile and network technologies»

Thesis project:

Thesis: Online course platform

Technology: React, TypeScript, Next.js, MongoDB

Description: Development of a comprehensive platform that allows users to enroll and take online courses. Implementation of advanced features for course management and user interaction

Training

AI-Engineer

11/2025–04/2026, NFactorial School, Almaty

- AI data processing;
- Using MCP (Model Context Protocol);
- Developing multimodal AI;
- Developing autonomous LLM agents;
- Using RAG (Retrieval Augmented Generation).

Competitive programming courses

09/2017–08/2020, M&C Training Center, Almaty

- Study of algorithms and data structures: sorting, binary search, graphs, trees, dynamic programming;
- Solving algorithmic problems in C++ with time and memory constraints;
- Working with advanced data structures: stack, queue, disjoint set system, prefix sums;
- Study of classical algorithms: Dijkstra's algorithm, Floyd-Warshall algorithm, graph traversal (BFS/DFS), topological sort; Programming MIPT School

08/2019, MIPT, Moscow

- Solving algorithmic problems with time and memory limitations in C++.
-

Certificates

- International Eurasian Olympiad in Informatics, 2019
 - International Olympiad "Innopolis", 2019
 - Republican Olympiad in Informatics of Kazakhstan, 2019
 - Internet programming competitions, 2017–2020
-

Skills

Programming languages: Python, C++, Linux, Java, JavaScript, React.js, Node.js, SQL, Docker, Git, REST.

Ability to work in a team. Ability to use communication skills.

Languages

- English B2 (conversational, technical)
- Russian (native)
- Kazakh (with dictionary)
